## Summary

---

I am a Reactjs Developer with experience in building scalable, tested, visually aesthetic and responsive website and web applications. I have the ability to adapt in both self-starting and collaborative environment while staying focus on achieving high quality result under strict deadlines.

I am a great team player, as demonstrated while working with productive team of different sizes comprising of cross-functional members mostly as a follower or a lead of other junior team members to deliver tested and quality solutions on time and budget

this has afforded me a great experience coming up the ladder in my career
